

Method selection map (frozen outer evaluation)

CPU

best observed: lightgbm+mint

recommended operational: lightgbm+mint (accuracy/coherence); ridge+bottom_up when bottom

unsuitable: see SAFE/UNSUPPORTED claims

Memory

best observed: dlinear+mint (by outer MAE)

recommended operational: ridge/dlinear+mint or wls; persistence independent remains comp

unsuitable: see SAFE/UNSUPPORTED claims

Disk

best observed: persistence+independent

recommended operational: persistence independent; ridge+top_down if coherence mandatory

unsuitable: see SAFE/UNSUPPORTED claims
